Preventive treatment preparation

Upon the request of your landlord, we have been asked to visit your apartment to make preventive treatment against insects. In order to obtain satisfactory results, your cooperation will be **necessary and obligatory**.

Before treatment

- 1) Clear the base of the walls by at least 24 inches
- 2) If the infested apartment is below or above, you must free the base of the walls of all rooms by at least 24 inches
- 3) Pick up objects left on the ground.
- 4) Vacuum
- 5) Disconnect all electrical appliances in rooms requiring treatment.

During treatment

All residents and their pets (including birds) must leave the premises for **4 to 6 hours**.

After treatment

- 1) Ventilate
- 2) VERY IMPORTANT Do not wash the floor for 2 - 3 weeks

Treatment date _____
